Geographical Index to Collecting Stations of the Exploratory Fishing Vessels Oregon, Silver Bay, Combat, and Pelican, 1950-65[1]

By

FREDERICK H. BERRY and SHELBY DRUMMOND

ABSTRACT

Geographic locality designations are applied to collecting stations of four Bureau of Commercial Fisheries exploratory fishing vessels during 1950-65 in the western Atlantic.

INTRODUCTION

Geographic locality designations are furnished for collecting stations occupied by the BCF (Bureau of Commercial Fisheries) exploratory fishing vessels Oregon, Silver Bay, Combat, and Pelican during 1950-65 in the western Atlantic Ocean, the Gulf of Mexico, the Caribbean Sea, and the Pacific Ocean off Panama. The boundaries of these locality designations are shown in figure 1. In localities adjacent to continental areas, the boundaries generally extend over the Continental Shelf onto the Continental Slope to a depth of about 300 fathoms (549 m.).

The biological specimens collected, preserved, and distributed to biologists and museums from cruises of these research vessels are valuable contributions to our knowledge of the fauna of the area, and the ready location of their place of capture is desirable. The collection localities of these specimens were recorded by consecutive station numbers of the four vessels. Station lists were issued by the BCF Exploratory Fishing and Gear Research Base at Pascagoula soon after the completion of each cruise. These station lists gave data on locality (latitude and longitude), depth, date of collection, temperatures at bottom and surface (where recorded), and type of collecting gear used. A list of consecutive station numbers, that also included bottom type, air temperature (where recorded), and time of collection, was published by Springer and Bullis (1956) for Oregon stations 1 to 1429. A similar list was published by Bullis and Thompson (1965) for the following vessels and stations:

Oregon stations 1430 to 3174,
Combat stations 1 to 530,
Silver Bay stations 1 to 2584,
Pelican stations 1 to 79.

To date, the only reference terms that have been supplied for the geographic localities of these stations have been in degrees and minutes of latitude and longitude. This paper lists standardized names for the geographical locations of the stations. Their use makes possible a more immediate and convenient location of the stations by state, country, or oceanic area. These designations are given in five tables. The localities are usually abbreviated after the first time they occur in tables 1 through 4.

Table 1 gives locality designations by consecutive station numbers for Oregon stations 1 to 5816. These stations were made generally throughout the area shown in figure 1, from North Carolina to Ceará, Brazil, and span the period 24 May 1950 through 2 December 1965. R. V. Oregon is continuing its exploration and collecting.

Table 2 gives locality designations for Silver Bay stations 1 to 5748, extending from North Carolina to Yucatán, Mexico, and from the Bahamas to Puerto Rico, from 13 June 1957 through 18 May 1964. Silver Bay was chartered by the Bureau of Commercial Fisheries during the above period; its exploratory collections have now ended.

Table 3 gives locality designations for Combat stations 1 to 530, from North Carolina to the Florida Straits and the North Bahamas, from 27 July 1956 through 9 October 1957. Combat was chartered by the Bureau of Commercial Fisheries during that period. The vessel burned and sank off Mexico in December 1957.

Table 4 gives locality designations for Pelican stations 1 to 1644, from North Carolina

[1] Contribution No. 49, Bureau of Commercial Fisheries Tropical Atlantic Biological Laboratory, Miami, Fla. 33149.

Note.--Frederick H. Berry, Systematic Zoologist (Fishes), Bureau of Commercial Fisheries Tropical Atlantic Biological Laboratory, Miami, Fla. 33149; and Shelby Drummond, Fishery Biologist, Bureau of Commercial Fisheries Exploratory Fishing and Gear Research Base, Pascagoula, Miss. 39567.

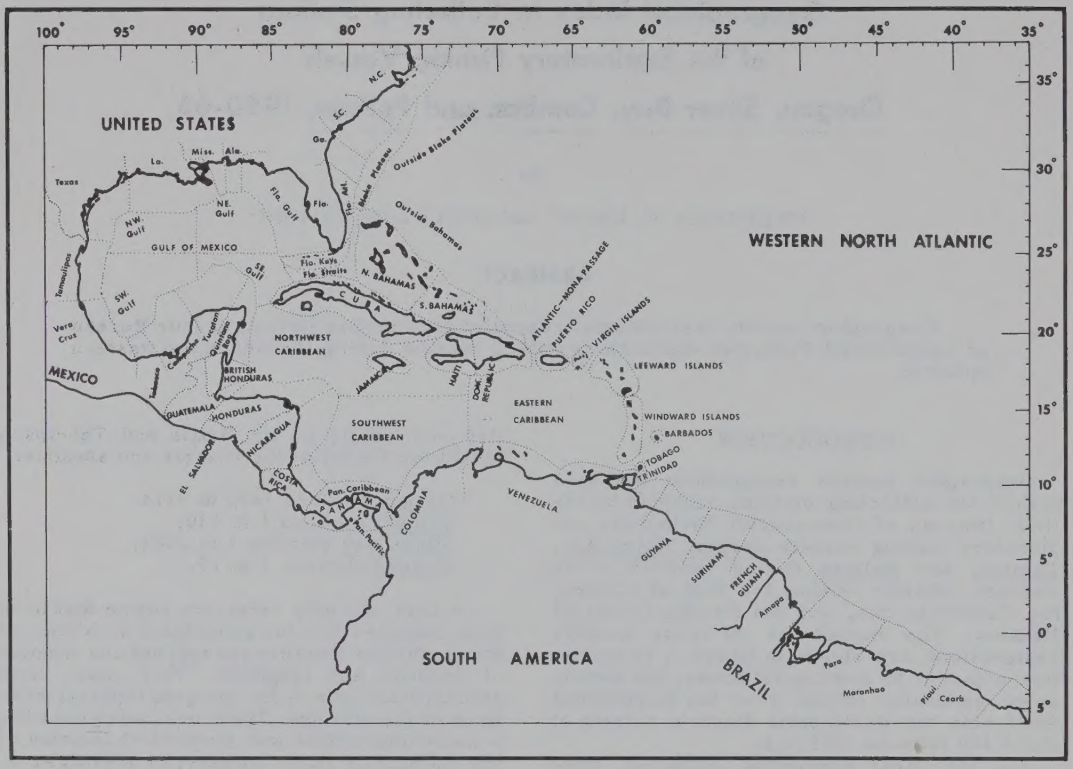

Figure 1.--Geographic boundaries of marine areas designated for locating collecting stations of the Oregon, Silver Bay, Combat, and Pelican.

to the Atlantic coast of Florida, and on both the Pacific and Caribbean coasts of Panama from 2 March 1956 through 27 June 1956, and from 31 August 1962 through 18 December 1963. Certain station numbers between 80 and 1599 that consisted only of sets with lobster traps are not included in tables 4 and 5. The Pelican was chartered by the Bureau of Commercial Fisheries during these periods, but is no longer engaged in exploratory fishing. In the station lists issued for the first three cruises of the Pelican (stations 1-79), station numbers were prefixed by "P-," but this prefix was deleted in the published station list (Bullis and Thompson, 1965). Another vessel named Pelican, owned by the U.S. Fish and Wildlife Service, conducted exploratory fishing off the southeastern coast of the United States from North Carolina to the Rio Grande River, 22 January 1938 through 18 April 1950. The collection stations of this earlier Pelican were designated by a station number (1-218) followed by a hyphen and a haul (or trawl) number; various numbers of hauls (1 - 27) were made at each station. A station list for stations 167 to 218 of the earlier Pelican was published by Anderson (1956).

Table 5 lists the numbers of vessel stations made at each geographically designated locality. The localities are generally arranged from north to south in two divisions: first, areas adjacent to the continents and contiguous areas in the Gulf of Mexico and Caribbean Sea; second, oceanic and insular areas from the Blake Plateau through the West Indies.

MS. # 1653

GPO 926-35

Created in 1849, the Department of the Interior--a department of conservation--is concerned with the management, conservation, and development of the Nation's water, fish, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States--now and in the future.
